

# CANES

EPSRC Centre for Doctoral Training in  
**Cross-Disciplinary Approaches  
to Non-Equilibrium Systems**

10 fully-funded 4-year PhD studentships

**N**on-equilibrium processes underpin many challenging problems across the sciences. The mission of CANES is to train a new generation of researchers in cross-disciplinary approaches to non-equilibrium systems. CANES draws on a vast range of supervisor expertise in Mathematics, Physics, Chemistry, Informatics, Computational & Systems Biomedicine, and Earth & Environmental Sciences.

- Training courses in the first year leading to an MSc
- Stipend for living expenses, circa £16,500 per year
- Additional conference travel funds
- Industrial and academic partners and internships
- Open question sandpits and annual retreats
