

**The European Center of Excellence (CoE) on
Novel Materials Discovery (NOMAD)
offers
20 positions for highly qualified
PhD students and postdocs**

The NOMAD CoE develops a ***Materials Encyclopedia*** and ***Big-Data Analytics*** tools for materials science and engineering. Eight complementary research groups of highest scientific standing in computational materials science along with four high-performance computer centers form the synergetic core of this CoE.

Interested candidates are invited to contact the PI they are interested to work with. The list of PIs and more details about the available positions can be found on our preliminary web site: <http://NOMAD-CoE.eu/>.
