

- Opened for submissions **June 2018**
- Covers all aspects of electronic structure research.
- Theory and experiment
- Multidisciplinary, spanning materials science, physics, chemistry and biology
- Led by Founding Editors-in-Chief **Bert de Jong** and **Risto Nieminen**
- First issue to be published before the end of 2018

## Editorial Board

**Atanu Bhattacharya** Indian Institute of Science,  
Bangalore, India

**Silke Biermann** École Polytechnique, France

**Volker Blum** Duke University, USA

**Steffen Duham** Soochow University, China

**Shin-ichi Fujimori** Japan Atomic Energy Agency,  
Japan

**Nicola Gaston** University of Auckland, New  
Zealand

**Debashree Ghosh** Indian Association for the  
Cultivation of Science, India

**Paolo Giannozzi** Università di Udine, Italy

**Paola Gori-Giorgi** Vrije Universiteit Amsterdam,  
Netherlands

**Niri Govind** Pacific Northwest National  
Laboratory, USA

**Marcella Iannuzzi** University of Zurich,  
Switzerland

**Eluvathingal D Jemmis** Indian Institute of Science,  
Bangalore, India

**Caroline Lynn Kamerlin** Uppsala University,  
Sweden

**Adam Kiejna** Wroclaw University, Poland

**Dattatray Late** CSIR National Chemical Laboratory,  
India

**Shuhua Li** Nanjing University, China

**Carla Molteni** King's College London, UK

**Leon Petit** Daresbury Laboratory, UK

**Matt Probert** University of York, UK

**Esa Räsänen** Tampere University of Technology,  
Finland

**Lucia Reining** ETSF Palaiseau, France

**Angel Rubio** Max Planck Institute for the Structure  
and Dynamics of Matter, Germany

**Stanko Tomić** University of Salford, UK

**Andre Schleife** University of Illinois at Urbana-  
Champaign, USA

**Renata Wentzcovitch** Columbia University, USA

## Why launch a new journal?

- **Multidisciplinary** – Electronic structure research spans a huge number of fields. Previously IOP has been unable to publish this content outside of condensed matter physics.
- **Rapidly growing field** – growing by over 1000 articles per year.
- **No single journal to unite the field** – strong support shown by academics within the community when we surveyed the idea.

## Journal Characteristics

- **Article types** – papers, reviews, technical notes. Technical notes are intended to be methodological articles such as code updates and new experimental techniques
- **Peer review** – single blind, run in house by our dedicated staff
- **Open Access Options** – hybrid OA, with options to suit all funding bodies
- **Free to publish** – no page charges or publication fees (aside from OA charges, 10% discount for referees)
- **Rapid publication** – accepted manuscripts online within 24 hours
- **Open data and open source code** - We strongly support the principles of transparency and openness in scientific research, we are currently exploring ways of integrating with data and code repositories
- **Free to read until the end of 2019**

## **Upcoming Focus Collections**

### **Understanding Chemistry and Biochemistry with Conceptual Models**

**Shina Caroline Lynn Kamerlin** Uppsala University

**Étienne Derat** Sorbonne Université Paris

### **ARPES Studies of Topological Materials**

**Phil King** St Andrews University

**Philip Hofmann** Aarhus University

### **Attosecond Spectroscopy and Phenomena**

**Atanu Bhattacharya** Indian Institute of Science, Bangalore

**Franck Lepine** Institute Lumière Matière, France

# ELECTRONIC STRUCTURE

Submit your article at  
[iopscience.org/est](http://iopscience.org/est)

*Electronic Structure* is a new multidisciplinary journal covering all theoretical and experimental aspects of electronic structure research, including the development of new methods.

## Editors-in-Chief

**Bert de Jong**  
LLBL

**Risto Nieminen**  
Aalto University

**Fast publication** accepted manuscripts online within 24 hours

**Free to publish** no page charges (for non-open access articles)

**Open access publishing options** to suit all major funding bodies

**Maximised visibility** All content is free to read until the end of 2019
